- 12 or 24-hour format
- Cost effective

Specifications

- Display Six digit; seven segment; red or green LED display
- Case Aluminum; 13.50"W x 5.50"H x 3.50"D
- Weight 2.5 pounds
- Power Source DC-MC1 120VAC 60Hz at 60mA
- Operating Temp. 0° to 49° Celsius (32° to 120° Fahrenheit)
- Case Finish Black powder coating
- Cabling Two wires

DC-Digital DC-MC1 Master Clock

The DC-Digital DC-MC1 master clock is designed to be a cost effective alternative to most master clocks. The simple design will allow for up to two different secondary clocks to be corrected from the DC-MC1 at the same time.

Time setting on the DC-MC1 master clock is simple: just press the set switches on the DC-MC1. The DC-MC1 can also correct an external source such as a intercom system or another master clock. The DC-MC1 can also receive an external correction from another source such as a intercom system or another master clock.
